Wednesday Challenge Form

Group Members: Aren, Armon, , and me

Problem Statement: Design and build a tower as high as possible using only marshmallows, graham crackers, and pretzel sticks.

Approach: First, we made a design that looked like it worked, but we decided not to do it. After that, we thought of a different and better design that looked like it would work perfectly. The design that we got however, was an entirely different story. It was doomed from the start.

Solution:

Lessons Learned:
